Saturday 10am–3pm

Architectural Association
36 Bedford Square
London WC1B 3ES
Information 020 7887 4145
www.aaschool.ac.uk

Concrete Geometries is a research initiative by the AA School of Architecture investigating the intimate relationship between spatial form and human processes – be they social or aesthetic – and the variety of new material entities this relationship might provoke. By bringing together art, architecture and the humanities, the cluster provides a platform beyond disciplinary boundaries. Concrete Geometries is directed by Marianne Mueller and Olaf Kneer and includes participants from Europe, Japan, Brazil, Venezuela, Canada and the USA.

Concrete Geometries is supported by the Austrian Cultural Forum London, the Embassy of the Netherlands and the CCW Graduate School.
